## Item 4: Advisory Business

### A. Description of the Advisory Firm

Maxwell Wealth Strategies Inc. (hereinafter "Maxwell Wealth") is a Corporation organized in the State of California. The firm was formed in July 2015, and the principal owner is James Eric Maxwell.

### B. Types of Advisory Services

#### *Portfolio Management Services*

Maxwell Wealth offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. Maxwell Wealth creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

Maxwell Wealth evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. Maxwell Wealth will require discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

Maxwell Wealth seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of Maxwell Wealth's economic, investment or other financial interests. To meet its fiduciary obligations, Maxwell Wealth attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, Maxwell Wealth's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is Maxwell Wealth's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

## *Financial Planning*

Financial plans and financial planning may include, but are not limited to: investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

## *Services Limited to Specific Types of Investments*

Maxwell Wealth generally limits its investment advice to mutual funds, fixed income securities, insurance products including annuities, equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds and non-U.S. securities, although Maxwell Wealth primarily recommends large cap. domestic stocks. Maxwell Wealth may use other securities as well to help diversify a portfolio when applicable.

## **C. Client Tailored Services and Client Imposed Restrictions**

Maxwell Wealth offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent Maxwell Wealth from properly servicing the client account, or if the restrictions would require Maxwell Wealth to deviate from its standard suite of services, Maxwell Wealth reserves the right to end the relationship.

## **D. Wrap Fee Programs**

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees and transaction costs. Maxwell Wealth does not participate in wrap fee programs.

## **E. Assets Under Management**

Maxwell Wealth has the following assets under management:

<b>Discretionary Amounts:</b>	<b>Non-discretionary Amounts:</b>	<b>Date Calculated:</b>
\$ 210,000,000	\$ 0	August 2023

## Item 5: Fees and Compensation

### A. Fee Schedule

#### *Portfolio Management Fees*

Total Assets Under Management	Annual Fees
\$250,000 - \$1,000,000	1.50%
\$1,000,001 - \$2,000,000	1.25%
\$2,000,001 - \$3,000,000	1.15%
\$3,000,001 - AND UP	1.00%

The advisory fee is calculated using the value of the assets in the Account on the last business day of the prior billing period.

These fees are generally negotiable and the final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of Maxwell Wealth's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

#### *Financial Planning Fees*

##### **Fixed Fees**

The negotiated fixed rate for creating client financial plans is between \$500 and \$5,000.

Clients may terminate the agreement without penalty, for full refund of Maxwell Wealth's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

### B. Payment of Fees

#### *Payment of Portfolio Management Fees*

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in advance.

#### *Payment of Financial Planning Fees*

Financial planning fees are paid via wire.

Fixed financial planning fees are paid 50% in advance, but never more than six months in advance, with the remainder due upon presentation of the plan.

### **C. Client Responsibility For Third Party Fees**

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by Maxwell Wealth. Please see Item 12 of this brochure regarding broker-dealer/custodian.

### **D. Prepayment of Fees**

Maxwell Wealth collects certain fees in advance and certain fees in arrears, as indicated above. Refunds for fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check, or return deposit back into the client's account.

For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate\* times the number of days elapsed in the billing period up to and including the day of termination. (\*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

Fixed fees that are collected in advance will be refunded based on the prorated amount of work completed at the point of termination.

### **E. Outside Compensation For the Sale of Securities to Clients**

Neither Maxwell Wealth nor its supervised persons accept any compensation for the sale of investment products, including asset-based sales charges or service fees from the sale of mutual funds.

## **Item 6: Performance-Based Fees and Side-By-Side Management**

Maxwell Wealth does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

## **Item 7: Types of Clients**

Maxwell Wealth generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

- ❖ Pension and Profit Sharing Plans
- ❖ Charitable Organizations
- ❖ Corporations or Business Entities

There is an account minimum of \$250,000, which may be waived by Maxwell Wealth in its discretion.

## Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

### A. Methods of Analysis and Investment Strategies

#### *Methods of Analysis*

Maxwell Wealth's methods of analysis include Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

**Fundamental analysis** involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

**Modern portfolio theory** is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

**Quantitative analysis** deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

**Technical analysis** involves the analysis of past market data; primarily price and volume.

#### *Investment Strategies*

Maxwell Wealth uses long term trading.

**Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.**

### B. Material Risks Involved

#### *Methods of Analysis*

**Fundamental analysis** concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in

stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

**Modern portfolio theory** assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

**Quantitative analysis** Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

**Technical analysis** attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

### *Investment Strategies*

**Long term trading** is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

**Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.**

## **C. Risks of Specific Securities Utilized**

Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

**Mutual Funds:** Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond “fixed income” nature (lower risk) or stock “equity” nature.

**Equity** investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

**Fixed income** investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

**Exchange Traded Funds (ETFs):** An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the

official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF's shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

**Annuities** are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

**Non-U.S.** securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

**Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.**

## Item 9: Disciplinary Information

### A. Criminal or Civil Actions

There are no criminal or civil actions to report.

### B. Administrative Proceedings

There are no administrative proceedings to report.

### C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

## **Item 10: Other Financial Industry Activities and Affiliations**

### **A. Registration as a Broker/Dealer or Broker/Dealer Representative**

Neither Maxwell Wealth nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

### **B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor**

Neither Maxwell Wealth nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

### **C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests**

James Eric Maxwell is an independent licensed insurance agent, and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. Maxwell Wealth always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients are in no way required to utilize the services of any representative of Maxwell Wealth in connection with such individual's activities outside of Maxwell Wealth.

James Eric Maxwell is the owner of Birch Lakes LLC.

Benjamin Ammon Bradford is an independent licensed insurance agent, and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. Maxwell Wealth. always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients are in no way required to utilize the services of any representative of Maxwell Wealth. in connection with such individual's activities outside of Maxwell Wealth.

Benjamin Ammon Bradford has a rental property.

#### **D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections**

Maxwell Wealth does not utilize nor select third-party investment advisers.

### **Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading**

#### **A. Code of Ethics**

Maxwell Wealth has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. Maxwell Wealth's Code of Ethics is available free upon request to any client or prospective client.

#### **B. Recommendations Involving Material Financial Interests**

Maxwell Wealth does not recommend that clients buy or sell any security in which a related person to Maxwell Wealth or Maxwell Wealth has a material financial interest.

#### **C. Investing Personal Money in the Same Securities as Clients**

From time to time, representatives of Maxwell Wealth may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of Maxwell Wealth to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. Maxwell Wealth will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

#### **D. Trading Securities At/Around the Same Time as Clients' Securities**

From time to time, representatives of Maxwell Wealth may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of Maxwell Wealth to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they

provide to clients. Such transactions may create a conflict of interest; however, Maxwell Wealth will never engage in trading that operates to the client's disadvantage if representatives of Maxwell Wealth buy or sell securities at or around the same time as clients.

## **Item 12: Brokerage Practices**

### **A. Factors Used to Select Custodians and/or Broker/Dealers**

Custodians/broker-dealers will be recommended based on Maxwell Wealth's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and Maxwell Wealth may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in Maxwell Wealth's research efforts. Maxwell Wealth will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

Maxwell Wealth will require clients to use Raymond James & Associates, member New York Stock Exchange/SIPC.

#### **1. *Research and Other Soft-Dollar Benefits***

While Maxwell Wealth has no formal soft dollars program in which soft dollars are used to pay for third party services, Maxwell Wealth may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). Maxwell Wealth may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and Maxwell Wealth does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. Maxwell Wealth benefits by not having to produce or pay for the research, products or services, and Maxwell Wealth will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that Maxwell Wealth's acceptance of soft dollar benefits may result in higher commissions charged to the client.

#### **2. *Brokerage for Client Referrals***

Maxwell Wealth receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

### ***3. Clients Directing Which Broker/Dealer/Custodian to Use***

Maxwell Wealth will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

#### **B. Aggregating (Block) Trading for Multiple Client Accounts**

If Maxwell Wealth buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, Maxwell Wealth would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. Maxwell Wealth would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution, except for those accounts with specific brokerage direction (if any).

## **Item 13: Review of Accounts**

#### **A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews**

All client accounts for Maxwell Wealth's advisory services provided on an ongoing basis are reviewed at least monthly by James Eric Maxwell, Managing Member and Chief Compliance Officer, with regard to clients' respective investment policies and risk tolerance levels. All accounts at Maxwell Wealth are assigned to this reviewer.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by James Eric Maxwell, Managing Member and Chief Compliance Officer. Financial planning clients are provided a one-time financial plan concerning their financial situation. After the presentation of the plan, there are no further reports. Clients may request additional plans or reports for a fee.

#### **B. Factors That Will Trigger a Non-Periodic Review of Client Accounts**

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, Maxwell Wealth's services will generally conclude upon delivery of the financial plan.

### **C. Content and Frequency of Regular Reports Provided to Clients**

Each client of Maxwell Wealth's advisory services provided on an ongoing basis will receive a monthly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. Maxwell Wealth will also provide at least quarterly a separate written statement to the client.

Each financial planning client will receive the financial plan upon completion.

## **Item 14: Client Referrals and Other Compensation**

### **A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)**

Maxwell Wealth does not receive any economic benefit, directly or indirectly from any third party for advice rendered to Maxwell Wealth's clients.

### **B. Compensation to Non - Advisory Personnel for Client Referrals**

Maxwell Wealth does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

## **Item 15: Custody**

When advisory fees are deducted directly from client accounts at client's custodian, Maxwell Wealth will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

## **Item 16: Investment Discretion**

Maxwell Wealth provides discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, Maxwell Wealth generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share.

## **Item 17: Voting Client Securities (Proxy Voting)**

Maxwell Wealth will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

## **Item 18: Financial Information**

### **A. Balance Sheet**

Maxwell Wealth neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

### **B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients**

Neither Maxwell Wealth nor its management has any financial condition that is likely to reasonably impair Maxwell Wealth's ability to meet contractual commitments to clients.

### **C. Bankruptcy Petitions in Previous Ten Years**

Maxwell Wealth has not been the subject of a bankruptcy petition in the last ten years.
